Forward Looking Statements

This communication includes "forward-looking statements," as such term is defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on the current beliefs of the Company's directors and executive officers (collectively, "Management"), as well as assumptions made by and information currently available to the Company's Management. All statements regarding the Company's business strategy and plans and objectives of Management of the Company for future operations, are forward-looking statements. When used in this communication, the words "anticipate," "believe," "estimate," "expect" and "intend" and words or phrases of similar meaning, as they relate to the Company or the Company's Management, are intended to identify forward-looking statements. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to be correct. Important factors that could cause actual results to differ materially from the Company's expectations ("cautionary statements") are loan losses, rapid and unanticipated deposit withdrawals, unavailability of sources of liquidity, additional regulatory requirements that may be imposed on community banks or banks generally, changes in interest rates, loss of key personnel, lower lending limits and capital than competitors, regulatory restrictions and oversight of the Company, the secure and effective implementation of technology, risks related to the local and national economy, changes in real estate values, the Company's implementation of its business plans and management of growth, loan performance, interest rates, and regulatory matters, the effects of trade, monetary and fiscal policies, inflation, and changes in accounting policies and practices. Based upon changing conditions, if any one or more of these risks or uncertainties materialize, or if any underlying assumptions prove incorrect, actual results may vary materially from those described as anticipated, believed, estimated, expected, or intended. The Company does not intend to update these forward-looking statements.

Proactive Strategy Control our Destiny vs. Lose Control

May and June of Last Year

- Improve Liquidity- to prepare for recessionary winds
- Reduce Loan to Deposit Ratio
- Rejected bond buying strategy
 - Consultants recommended in 2021 and 2022

Fall Strategic Planning

- Build a Fortress Balance sheet
 - Prioritize liquidity
 - Deposit growth
 - Deemphasize lending

2023 Strategic Goals

Increase visibility and outreach to shareholders

OTCQX, Investor relations, virtual investor presentations

Manage to a 1% ROA, 10% ROE and under 60% efficiency ratio

But not at the expense of losing deposits

Growth Priorities:

- Balance sheet favors deposit growth over loans Ο
- Manage to an 80% loan-to-deposit ratio Ο
- Outperform the market regarding cost of funds Ο
- Outperform the market regarding NIM 0

Selective expansion: geographic and team lift out

Banking Industry Impact – Key headlines today

Liquidity vs Profits Uninsured Depositors Client Concentrations Industry Concentrations Run on Deposits/Short Sellers Capital Asset Quality

Calls for Strategic Actions

- Approximately \$433 billion in deposits have left banks in the US since early March (data as of April 26, 2023) – Banks competing with US Treasury for Deposits
 - March deposit outflows from all banks peaked at \$172 billion in the week of March 22
 - Endeavor Bank deposits have increased \$39.2 million (9.1%) between March 1 through April 30

A Few Helpful Banking Terms

- Uninsured deposits, Industry and Client Concentrations Why they matter?
- Liquidity How do you measure it and why is it important?
- Bond Portfolio Why have so many banks lost money on their bond portfolios?
- Why do banks purchase bonds?
- Unrealized / Realized Bond losses How do they effect bank health?
- Loan to Deposit Ratio liquidity vs profits
- **Run on Deposits** Cause and how to mitigate?

Top Defensive Strategic move-Reduce Risk of Deposit Flight

After the Silicon Valley Bank (SVB) seizure:

- We spoke to 100% of all Endeavor clients with deposits exceeding the \$250,000 limit
- We were able to shift an additional \$152 million of "uninsured" deposits into fully FDIC insured through our IntraFi/ICS program.
- Almost 75% of total deposits are now FDIC insured.
- The Strategic shift to ICS has grown our reciprocal deposits to \$220 million, requiring us to report \$127.7 million of this as "Brokered Deposits" on the Call report.

*as of March 31, 2023

2023 Strategy – Prioritize Liquidity

- 25% of our assets, totaling in excess of \$134 million, are in overnight cash liquid reserves* (interest earning, 4.59%)
- Only \$7 million in Investments (Primarily Bonds)
 - Unrealized loss "mark to market" of less than \$500 thousand
 - All eligible securities have been pledged with the FHLB borrowing for additional borrowing capacity
- Line of credit availability
 - In excess of \$128 million fully available with nothing outstanding.

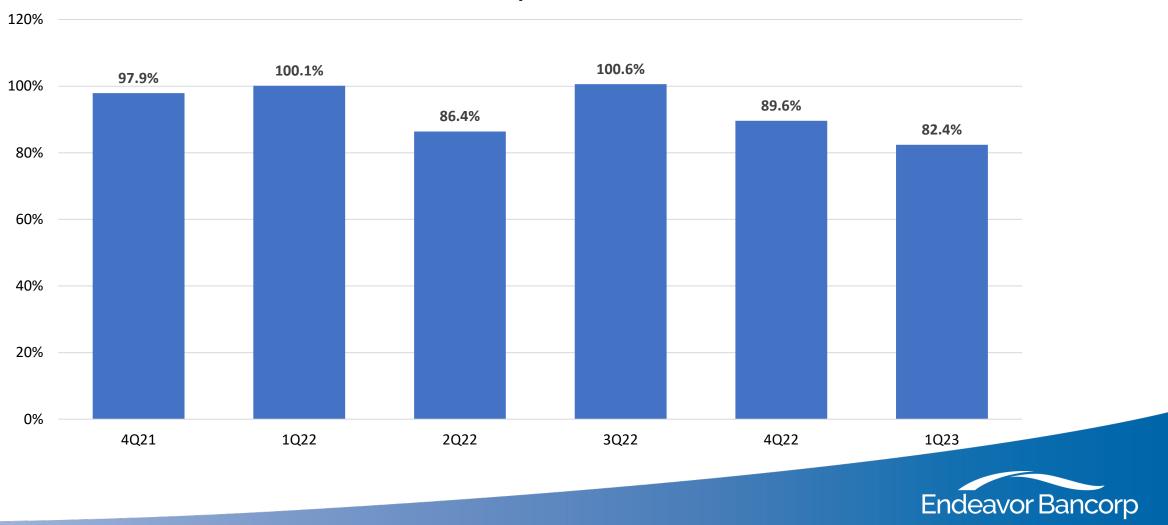

*As of April 30, 2023

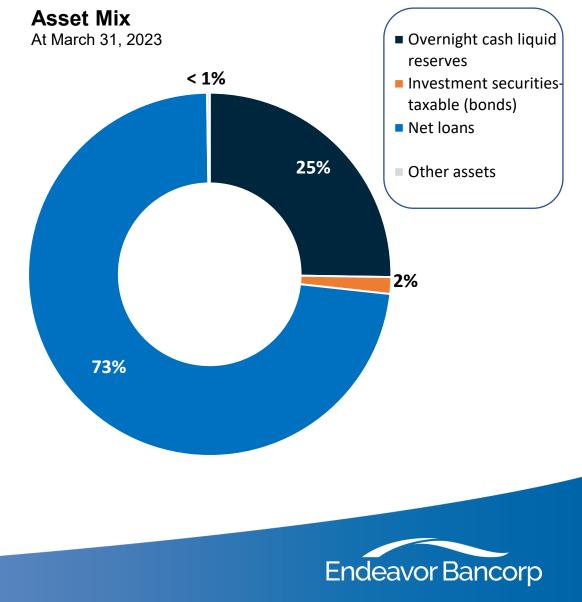

Loan to Deposit Ratio Trends Our Strategy - reduce to 80%

Summary of Key Takeaways

Liquidity

What other banks did – (sector concentrations, long duration bonds, dropped hedges, emphasized profits over liquidity **Bond Portfolios**

% assets - many invested a high percentage of liquidity in bonds when rates were much lower

Loan to Deposit ratio

Many banks increased L to D ratio to 100% or above to drive earnings Placed heavy reliance on their ability to source and maintain deposits Many need to pay up for wholesale deposits or borrow on liquidity lines Crushes NIM (profits) and increases liquidity risk

Deposit Growth

Many banks have weak strategies to grow their deposit franchise

The industry poorly timed strategic decisions, followed by key bank failures... Have caused investors to temporarily lose confidence in the sector

Endeavor Bank by Comparison

Liquid

Vast majority of our reserves are in cash – minimal exposure to bonds \$130 million in cash – overnight investments with FF and Cash

Proactively reduced level of uninsured deposits

Lowered volatility of deposit risk – no reason to fly to TBTF institutions when fully insured

Reduced Loan to Deposit ratio to more conservative level

Strategically built a loan portfolio to emphasize floating rate loans.

Low fixed rate asset to floating rate asset ratio (loan portfolio)

Deposit Growth since end of the year – up close to 10%

No net deposit losses

Solid profitability
